

# StackOverflow

<https://stackoverflow.com/users/884770/oberstet>

The screenshot displays the Stack Overflow user profile for 'oberstet' (Tobias Oberstein). The browser window title is 'User oberstet - Stack Overflow - Mozilla Firefox'. The URL is 'https://stackoverflow.com/users/884770/oberstet'. The profile header shows the user's name, reputation (18,110), and a search bar. The left sidebar contains navigation links: Home, PUBLIC, Stack Overflow, Tags, Users, Jobs, TEAMS, and What's this? (Free 30 Day Trial). The main content area is divided into several sections:

- Profile:** Includes a 'Profile' tab, 'Activity', 'Developer Story', and 'Edit profile and settings'.
- REPUTATION:** Shows a reputation of 18,110, a top tag of 'websocket' (+268), and a 'Next privilege' of 'Access trusted user tools' at 20,000 Rep.
- BADGES:** Displays various badges, including 'Famous Question' and 'Inquisitive'.
- IMPACT:** Shows '~1.2m people reached', '15 posts edited', '0 helpful flags', and '199 votes cast'.
- Summary:** A tabbed interface showing 'Answers (274)', 'Questions (24)', 'Tags (246)', and 'Bookmarks (10)'. The 'Answers' section lists 274 answers, with the top ones being 'WebSockets, UDP, and benchmarks' (200 votes), 'Loadbalancing web sockets' (91 votes), 'Chunking WebSocket Transmission' (81 votes), 'Can websocket messages arrive out-of-order?' (57 votes), and 'WSS on HTTP vs WSS on HTTPS' (48 votes). The 'Questions' section lists 24 questions, with the top ones being 'Tracking amount of bytes written to temp tables' (0 votes), 'Writing a DTrace consumer in C' (9 votes), 'Can SO\_REUSEPORT be used on Unix domain sockets?' (7 votes), 'Using boost::future with continuations and boost::when\_all' (6 votes), and 'boost::future and continuations - value set, but future still blocks' (2 votes). The 'Tags' section shows 246 tags, with the top ones being 'websocket' (188 votes), 'autobahn' (96 votes), 'python' (90 votes), 'node.js' (25 votes), 'load-balancing' (2 votes), 'server-push' (2 votes), 'javascript' (51 votes), 'performance' (200 votes), 'udp' (200 votes), 'html' (25 votes), and 'docker login fails on a server with no X11 installed' (10 votes). The 'Bookmarks' section shows 10 bookmarks.

# Keybase

<https://keybase.io/oberstet>

The screenshot shows the Keybase web interface. On the left is a blue sidebar with navigation links: People, Chat, Files, Crypto, Teams, Wallet, Git, Devices, and Settings. The main content area displays the profile of Tobias Oberstein (username: oberstet). The profile includes a circular profile picture, the name 'oberstet' in orange, and 'Tobias Oberstein' below it. It shows '16 Followers · Following 25' and a bio: 'yeah, I am real .. ly busy - got a todo list longer than a fucking leonard cohen song. I love Python, Ethereum, the IETF and Crossbar.io / XBR'. The location is listed as 'Germany'. There are 'Edit profile' and 'Chat' buttons. To the right, under the 'Teams' section, there is a list of verified identities, each with a blue checkmark icon: oberstet@github, oberstet@reddit, crossbar.io@dns, 53E7 088F 1DBF 3017@pgp, oberstet\*keybase.io@stellar, Prove your Twitter, Prove your Hacker News, Prove your website, Set a Bitcoin address, and Set a Zcash address. At the bottom right is a button that says 'Add more identities'.
